2. Electronic records — statutory checklist

Ex-A13 — CCTV footage / DVR / NVR — CURABLE GAPS (63/100). 4 required item(s) still to be completed before the record is relied on: cert_part_b, sealed, custody_chain, seal_integrity

Check	Law	Requirement	Status	Detail	Remedy
s61_recognition	BSA 2023 s.61	Electronic record recognised as a document	PASS	Admissibility cannot be refused merely because it is electronic.	
s62_route	BSA 2023 s.62 / s.63(1)	Mode of proof identified	PASS	Computer output / copy proved under BSA s.63 with the s.63(4) certificate	Record how the record reaches court: original device, forensic image, exported copy, screen capture or printout.
s63_2_a	BSA 2023 s.63(2)(a)	Device regularly used for the activity by the person in lawful control	PASS	Confirmed	Obtain a statement from the person in charge (by designation) on regular use during the period.
s63_2_b	BSA 2023 s.63(2)(b)	Information of this kind regularly fed in the ordinary course	PASS	Confirmed	Document the normal recording/entry practice (e.g. CCTV records continuously; phone used for messaging).
s63_2_c	BSA 2023 s.63(2)(c)	Device operating properly, or malfunction did not affect the record	PASS	Confirmed	Record device health/logs; for CCTV note any outage and that it did not affect the relevant period.
s63_2_d	BSA 2023 s.63(2)(d)	Record reproduces / is derived from information fed in the ordinary course	PASS	Confirmed	State how the output was produced (export tool, image, file path) so derivation is traceable.
cert_part_a	BSA 2023 s.63(4) + Schedule Part A	Certificate signed by person in charge of the device / relevant activities	PASS	Signed (Shift manager, toll plaza)	Draft with generate_bsa63_certificate; get it signed by person in charge of the device / relevant activities. Attach it every time the record is submitted.
cert_part_b	BSA 2023 s.63(4) + Schedule Part B	Certificate signed by an expert	MISSING	Not yet signed	Draft with generate_bsa63_certificate; get it signed by an expert; any person with special skill in computer science / cyber forensics may sign if the court is satisfied. Attach it every time the record is submitted.
hash_recorded	BSA 2023 s.63(4) Schedule (hash value)	Hash of the record computed and recorded at acquisition	PASS	SHA-256 9f2c6a1e4b7d8c0f...	Compute SHA-256 of the image/export at seizure and record it in the seizure memo and Part A.
hash_verified	Integrity (hash verification)	FSL re-hash matches acquisition hash	MISSING	Lab verification pending	FSL cyber division re-computes the hash on receipt and records it.
acquisition_quality	BSA 2023 s.63(1) (computer output)	Reliable acquisition method	PASS	exported_copy	Prefer a forensic image or native export with hash over screenshots/printouts.
write_blocker	Forensic procedure	Write-blocking during acquisition	NA	Not applicable to this source	Acquire through a hardware/software write blocker and note it in Part B.
clock_sync	BSA 2023 s.63(2)(c) (accuracy)	Device clock offset documented	PASS	offset -94 s	Photograph the DVR clock beside a reference clock at seizure and record the offset.
seizure_video	BNSS 2023 s.105	Search & seizure recorded by audio-video means	MISSING	Not stated	Record seizure on video (mobile phone suffices) and preserve it with its own hash.
sealed	Chain of custody	Exhibit sealed and the sealing recorded	MISSING	0 sealing event(s) in the ledger	Record the sealing with record_custody_event(event='sealed', seal_intact=true).

Check	Law	Requirement	Status	Detail	Remedy
custody_chain	Chain of custody	Every transfer (IO -> Malkhana -> FSL) recorded	MISSING	0 hand-over/receipt event(s)	Record each hand-over and receipt with roles (never names).
seal_integrity	Chain of custody	Seal found intact at every hand-over	MISSING	0 seal observation(s)	Note seal condition at every hand-over.
result_integrity	Pramaan ledger	Stored triage result matches its recorded hash	PASS		Investigate ledger tampering before relying on any output.

Ex-A14 — Mobile phone / SIM — CURABLE GAPS (4/100). 11 required item(s) still to be completed before the record is relied on: s62_route, s63_2_a, s63_2_b, s63_2_c, s63_2_d, cert_part_a, cert_part_b, hash_recorded, sealed, custody_chain, seal_integrity

Check	Law	Requirement	Status	Detail	Remedy
s61_recognition	BSA 2023 s.61	Electronic record recognised as a document	PASS	Admissibility cannot be refused merely because it is electronic.	
s62_route	BSA 2023 s.62 / s.63(1)	Mode of proof identified	MISSING	Acquisition method not recorded	Record how the record reaches court: original device, forensic image, exported copy, screen capture or printout.
s63_2_a	BSA 2023 s.63(2)(a)	Device regularly used for the activity by the person in lawful control	MISSING	Not recorded	Obtain a statement from the person in charge (by designation) on regular use during the period.
s63_2_b	BSA 2023 s.63(2)(b)	Information of this kind regularly fed in the ordinary course	MISSING	Not recorded	Document the normal recording/entry practice (e.g. CCTV records continuously; phone used for messaging).
s63_2_c	BSA 2023 s.63(2)(c)	Device operating properly, or malfunction did not affect the record	MISSING	Not recorded	Record device health/logs; for CCTV note any outage and that it did not affect the relevant period.
s63_2_d	BSA 2023 s.63(2)(d)	Record reproduces / is derived from information fed in the ordinary course	MISSING	Not recorded	State how the output was produced (export tool, image, file path) so derivation is traceable.
cert_part_a	BSA 2023 s.63(4) + Schedule Part A	Certificate signed by person in charge of the device / relevant activities	MISSING	Not yet signed	Draft with generate_bsa63_certificate; get it signed by person in charge of the device / relevant activities. Attach it every time the record is submitted.
cert_part_b	BSA 2023 s.63(4) + Schedule Part B	Certificate signed by an expert	MISSING	Not yet signed	Draft with generate_bsa63_certificate; get it signed by an expert; any person with special skill in computer science / cyber forensics may sign if the court is satisfied. Attach it every time the record is submitted.
hash_recorded	BSA 2023 s.63(4) Schedule (hash value)	Hash of the record computed and recorded at acquisition	MISSING	No hash recorded at acquisition	Compute SHA-256 of the image/export at seizure and record it in the seizure memo and Part A.
hash_verified	Integrity (hash verification)	FSL re-hash matches acquisition hash	MISSING	Lab verification pending	FSL cyber division re-computes the hash on receipt and records it.
acquisition_quality	BSA 2023 s.63(1) (computer output)	Reliable acquisition method	MISSING	Not recorded	Prefer a forensic image or native export with hash over screenshots/printouts.
write_blocker	Forensic procedure	Write-blocking during acquisition	MISSING	Storage/mobile acquisition	Acquire through a hardware/software write blocker and note it in Part B.
clock_sync	BSA 2023 s.63(2)(c) (accuracy)	Device clock offset documented	NA	CCTV/DVR only	Photograph the DVR clock beside a reference clock at seizure and record the offset.

Check	Law	Requirement	Status	Detail	Remedy
seizure_video	BNSS 2023 s.105	Search & seizure recorded by audio-video means	MISSING	Not stated	Record seizure on video (mobile phone suffices) and preserve it with its own hash.
sealed	Chain of custody	Exhibit sealed and the sealing recorded	MISSING	0 sealing event(s) in the ledger	Record the sealing with record_custody_event(event='sealed', seal_intact=true).
custody_chain	Chain of custody	Every transfer (IO -> Malkhana -> FSL) recorded	MISSING	0 hand-over/receipt event(s)	Record each hand-over and receipt with roles (never names).
seal_integrity	Chain of custody	Seal found intact at every hand-over	MISSING	0 seal observation(s)	Note seal condition at every hand-over.
result_integrity	Pramaan ledger	Stored triage result matches its recorded hash	PASS		Investigate ledger tampering before relying on any output.

3. Statutory basis

Provision	Subject	Rule (summary)	How Praamaan implements it
BSA 2023 s.61	Electronic or digital record	Admissibility of an electronic or digital record cannot be denied merely because it is electronic; subject to s.63 it has the same legal effect as other documents.	Every exhibit of category 'digital' (mobile phone, CCTV/DVR, computer/storage) gets an electronic-record assessment; the s.61 check records its recognition.
BSA 2023 s.62	Special provisions as to evidence relating to electronic record	The contents of electronic records may be proved in accordance with s.63.	The 'route' check decides whether the record is proved by producing the original device or by a s.63 computer output + certificate.
BSA 2023 s.63(1)	Admissibility of electronic records	A computer output (paper, stored, recorded or copied in optical/magnetic/semiconductor media) is deemed a document and admissible if the s.63 conditions are satisfied.	Acquisition method is captured (original device / forensic image / exported copy / screen capture / printout) and graded for reliability.
BSA 2023 s.63(2)(a)	Regular use	Output produced while the device was regularly used for an activity regularly carried on by the person having lawful control over it.	ElectronicRecord.regular_use -> check s63_2_a.
BSA 2023 s.63(2)(b)	Ordinary course	Information of the kind in the record was regularly fed into the device in the ordinary course of those activities.	ElectronicRecord.ordinary_course -> check s63_2_b.
BSA 2023 s.63(2)(c)	Proper operation	The device was operating properly, or any malfunction did not affect the record or the accuracy of its contents.	ElectronicRecord.operating_properly (+ CCTV clock offset) -> checks s63_2_c, clock_sync.
BSA 2023 s.63(2)(d)	Derived from ordinary course	The record reproduces or is derived from information fed in the ordinary course of the activities.	ElectronicRecord.derived_from_ordinary_course -> check s63_2_d.
BSA 2023 s.63(4) + Schedule	Certificate (Part A and Part B)	A certificate in the Schedule form must accompany the electronic record each time it is submitted: Part A by the person in charge of the device, Part B by an expert, with the hash value(s).	Checks cert_part_a, cert_part_b, hash_recorded; generate_bsa63_certificate drafts both parts pre-filled with device particulars and hashes.

Provision	Subject	Rule (summary)	How Pramaan implements it
Integrity (hash)	Hash verification	A hash recomputed at the laboratory must equal the hash recorded at acquisition; any difference means the record changed.	hash_verified check; a mismatch raises HASH_MISMATCH and makes the record AT RISK.
BNSS 2023 s.105	Audio-video recording of search and seizure	The process of search and seizure, including preparation of the list of seized items, is to be recorded through audio-video electronic means.	Caselnput.seizure_video_recorded -> check seizure_video for every exhibit.
IT Act 2000 s.79A	Examiner of Electronic Evidence	Government-notified examiners provide expert opinion on electronic-form evidence.	Part B expert role is recorded (FSL cyber division / notified examiner / other qualified expert).
Case law (under IEA s.65B, predecessor of BSA s.63)	Anvar P.V. v. P.K. Basheer (2014); Arjun Panditrao Khotkar v. Kailash Kushanrao Gorantyal (2020)	The certificate is a condition precedent when a copy/computer output is relied upon; it is not needed where the original device itself is produced as primary evidence.	Route 'original_device' marks certificate checks as recommended rather than required; every other route makes them required.
Pune Bar Association v. Union of India (SC, 2026, as reported)	Who may sign Part B	Any individual with special skill and expertise in computer science / cyber forensics may sign Part B, if the court is satisfied.	expert_role is free text; Pramaan asks for the designation and qualification basis, not only government notification.
